

MUGA SCAN

Your doctor has scheduled you for a MUGA Scan at our **Christian Northeast office, Building 1 Suite 304E** or **Granite City office 2118 Washington Ave** on _____ at _____ am/pm.

During the test:

An IV will be placed in a vein in your arm.

A small amount of blood will be withdrawn.

The blood will be mixed with a radioactive material and re-injected approximately 20 – 25 minutes later.

The IV will then be removed.

We will connect 3 EKG electrodes to your chest and take three 5 minute pictures of your heart in different views.

The entire test takes approximately 1 hour.

You do not need to make any changes or preparations for this test.

Please have no gum, candy, food, etc. in your mouth at the time of testing.
